

APPENDIX A

FY 2006

PROJECT PRIORITY LIST

FOR THE

CLEAN WATER STATE REVOLVING FUND PROGRAM

**LOUISIANA DEPARTMENT OF ENVIRONMENTAL QUALITY
FINANCIAL SERVICES DIVISION
LOAN SECTION**

Amended 4/4/2006

STATE OF LOUISIANA
CLEAN WATER STATE REVOLVING FUND
AMENDED PROJECT PRIORITY LIST FOR FY 2006

The federal Clean Water Act requires that the State may provide financial assistance from its water pollution control revolving fund for construction of wastewater treatment works only if such projects are on the State's priority list, prepared in accordance with Section 216 of the Act. Such assistance may be provided regardless of the rank of such project on such list.

To satisfy this requirement, the Project Priority List contains a listing of those potential projects that have submitted pre-application forms and have expressed a continuing interest in the State Revolving Loan Fund program. Although the Act only requires that projects for construction of wastewater treatment works must be included on the priority list, other types of projects are also included if they are eligible for assistance and pre-application forms have been submitted.

Information for each potential project was obtained from either project pre-application forms, or where available, from facility planning documents. Information about proposed amounts dates and project descriptions are included if estimated information has been provided. The lack of such information on the Project Priority List does not prevent a project from receiving financial assistance.

More detailed project information about those projects scheduled to receive assistance through the State Revolving Loan Fund program is contained in the Intended Use Plan, which is now the instrument used to identify potential projects for the State Revolving Loan Fund each year.
